Screening of organic compounds in the e-liquid

Test method: GC Screening (SOPN 40).

Identified propylene glycol, glycerol and flavouring compounds. No traces of extraction solvents found.
No harmful substances (nitrosamines, pesticides, aromatic carbohydrates, polycyclic aromatic carbohydrates etc.).

Screening of organic compounds in the aerosol („vapor“)

Test methods: Simulated vaping, aerosol analyzed by GC-MS

Identified propylene glycol, glycerol and flavouring compounds. No products of burning (acetaldehyde, formaldehyde, acrolein etc.) or harmful flavoring components (diacetyl, acetoin, acetyl propionyl etc.) detected.
